

### **AMENDMENTS TO THE CLAIMS**

This listing of claims replaces all prior versions, and listing, of claims in the application:

#### Listing of Claims:

1     1.     (Previously Presented) A beverage bottle comprising an outer container for  
2           holding a first liquid and an inner container within the outer container for holding  
3           a second liquid such that the first and second liquids are kept separate until they  
4           are poured or dispensed from the bottle wherein the inner container defines an  
5           inner surface that is substantially helical in configuration so as to cause  
6           simultaneous dispensing of the first liquid and the second liquid.

1     2.     (Previously Presented) The beverage bottle according to claim 1, wherein the  
2           inner container is fixed to a sleeve positioned in an open end of the outer  
3           container.

1     3.     (Previously Presented) The beverage bottle according to claim 2, wherein the  
2           sleeve has a first aperture to allow the first liquid to be dispensed from the bottle  
3           and a second aperture to allow the second liquid to be dispensed from the bottle.

1     4.     (Previously Presented) The beverage bottle according to claim 3, wherein at  
2           least one of the first aperture and the second aperture is sealed to keep the first  
3           and second liquids separate until the liquids in the bottle are dispensed.

1     5.     (Previously Presented) The beverage bottle according to claim 1, wherein the  
2           inner container is secured to a base of the outer container.

1 6. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 inner container is secured to a base of the outer container by means of a  
3 supporting collar.

1 7. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 inner container has a rectangular, square, or triangular cross-section.

1 8. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 outer container is formed of glass or a plastics material.

1 9. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 inner container is formed of glass or a plastics material.

1 10. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 outer and inner containers are transparent.

1 11. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 outer and inner containers dispense the liquids contained therein at a constant  
3 ratio.

1 12. (Previously Presented) The beverage bottle according to claim 1, wherein the  
2 inner container is twisted along its length with the number of twists selected so  
3 as to dispense the liquid contained therein at a predetermined rate.

1 13. (Previously Presented) The beverage bottle according to claim 3, wherein the  
2 first and second apertures are chosen to dispense the liquids contained in said  
3 containers at predetermined rates.

1 14-17. (Cancelled)
